# Trends in Data Science & Analytics

Leveraging data and artificial intelligence is transforming industries globally and India is leading the way.

With businesses adopting Generative AI tools like ChatGPT, Gemini, and Copilot to streamline analytics, the demand for data scientists skilled in these technologies is rapidly rising.

## What's Driving Data Science Growth?

Growing reliance on data-driven business decision

Widespread digital transformation across industries

AI, ML, Deep Learning and GenAI driving smart tech shifts

Leveraging data and GenAI to personalise user journeys

**118.7 billion**

value of the Data Analytics industry in India by 2026.

---

**Data Scientist**

roles are growing at 14% annually, and are expected to create 11 million jobs by 2026.

# About the program

Imarticus Learning leads the way in bridging the skills gap in data science, empowering professionals through our flagship **Postgraduate Program in Data Science and Analytics with GenAI**.

Designed for fresh graduates and **early-career professionals** (0-3 years of experience), this program equips you with analytical thinking, problem-solving, and technical expertise to excel as a data science professional. You'll gain hands-on experience with 35+ tools and projects, including GenAI applications like ChatGPT, Gemini and Copilot, along with technologies such as Retrieval-Augmented Generation (RAG) to streamline coding, debugging, and reporting.

## No programming experience? No problem!

We guide you from the basics to proficiency in **Python, SQL, Machine Learning, Deep Learning, and using Gen AI tools** to help you develop proficiency.

# Key highlights of the program

## Industry-aligned Curriculum

Learn Python, SQL, ML, Tableau, Power BI, and Gen AI-based applications.

## 100% Job Assurance

Launch your career with our job-assurance training program.

**Data Science  
& AI Studio**

## Data Science and AI studio

Master real-world skills through Hackathons, Blogathons, Masterclasses, and hands-on business challenges.

## Advanced Data Science Internship

Get industry-relevant data science experience with hands-on internships.

# Key highlights of the program

## Interactive Learning Experience

Join live, interactive sessions and collaborate with peers whether you're learning online or offline.

## Hands-on Learning

Apply concepts through real-world projects in a practical manner.

## National-level Hackathons & Blogathons

Solve real business challenges and showcase your skills to build a strong portfolio and personal brand.

## Built for Career Success

Become part of our growing alumni network, excelling in data careers.

# Data Science & AI Studio

## A Real-World Edge, Built Into Your Program

Experience a hands-on learning ecosystem designed to fast-track your career. Work on real-world projects, compete in hackathons, and tackle real business problems.

With expert-led masterclasses and internship opportunities, you'll seamlessly bridge the gap between classroom learning and industry experience—making you job-ready from day one.

# Internships with Imarticus Data Science Consulting Club

Stand out with merit-based internships during your training and step into top data roles.

## Expert Mentorship

Receive expert guidance while you work on real business problems.

## Career Advancement

Build an industry-validated portfolio through hands-on projects, elevating your chances of landing top roles

## Industry-Led Learning

Gain practical insights and skills by working on real business challenges with industry leaders.

## Networking

Connect with professionals and grow your network in the data science community.

# National level Hackathons

Put your skills to the test in a national-level hackathon and solve real, high-impact data challenges.

Here is what our learners have built

## AquaCast: Groundwater Availability Predictor

AquaCast is a predictive water model that estimates groundwater availability across 8 Indian states using recharge data from monsoon, non-monsoon, and annual sources. It helps drive sustainable water management through data-backed insights.

## CareerAlign: AI-Driven Career Navigator

CareerAlign is an AI-powered career navigator that analyzes your skills, interests, and market trends to recommend best-fit career paths, identify skill gaps, and suggest actionable next steps—offering a smarter, data-driven alternative to traditional counseling.

## MediFusion AI: Personalized Healthcare Intelligence

MediFusion AI is a personalized healthcare platform that uses AI to enhance patient outcomes, streamline provider workflows, and simplify insurance—enabling smarter decisions, lower costs, and better access to care.

## VidSyn: AI-Powered YouTube Summarizer

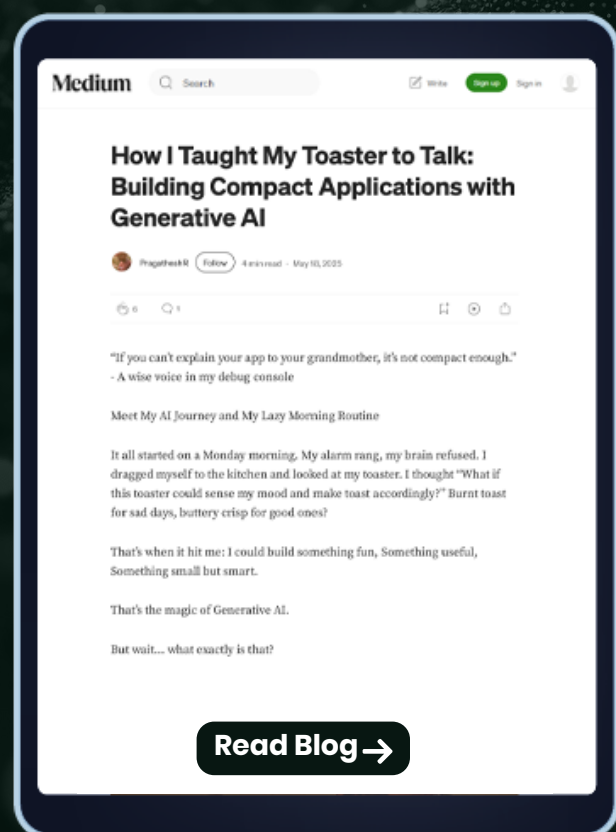

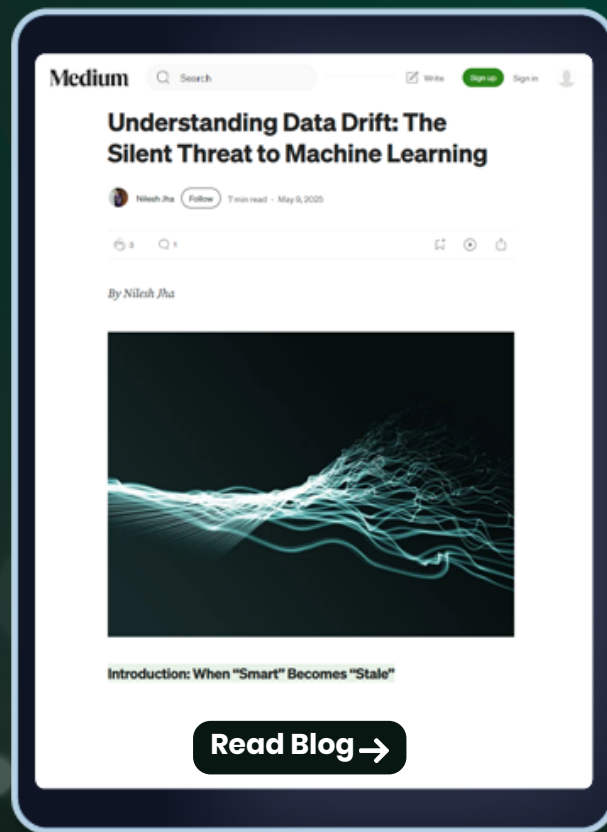

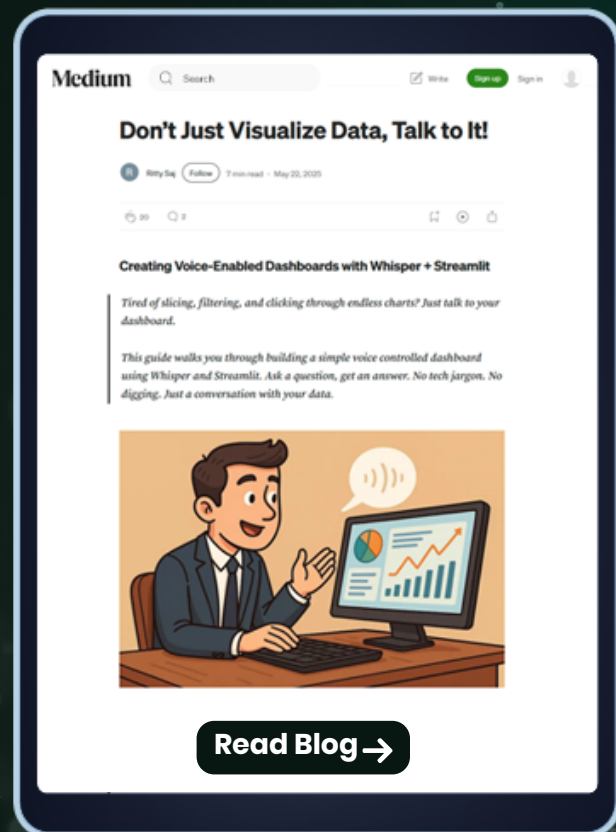

VidSyn is a multilingual AI tool that quickly summarises YouTube videos by identifying key segments and delivering concise, viewer-friendly summaries. Built for students, professionals, and creators, it helps you save time without missing the essentials.

# National level Blogathons

Transform your data science skills into impactful blogs and get featured on Imarticus' digital platforms.

See how our learners have turned knowledge into innovation

## Project Bootcamp

A 3-week bootcamp where you'll work on real-world projects, improve job readiness through hands-on practice, and learn alongside peers through discussions on real business problems.

## Masterclasses by Industry Experts

Get exposure to 4 industry-aligned advanced technical masterclasses focused on trending tools, techniques, and real-world problems. Deepen your understanding of advanced topics and stay ahead of industry demands.

# Program Curriculum

## Data Science Launchpad

Start learning right after registration — no waiting.

- Build an analytical mindset by learning Excel, Python, Power BI, and databases
- Get started with Prompt Engineering and Exploratory Data Analysis (EDA)
- Understand how data drives real business decisions through case studies
- Strengthen your data storytelling and problem-solving abilities

## Foundations of Data & AI Awareness

1

- Understand Data Science & real-world use cases
- Learn what AI & GenAI mean for industry
- Explore ChatGPT, Gemini & Copilot for analytics
- Build a data mindset: types, formats & context
- Basics of prompt engineering for GenAI tools

## Excel for Data Analysis

2

- Master Excel functions: VLOOKUP, IF, INDEX-MATCH
- Clean, validate & transform raw data
- Create Pivot Tables, dashboards & KPI reports
- Use Copilot & ChatGPT to generate formulas/macros
- Mini Project: MegaMart Sales Dashboard with GPT

## SQL for Data Handling

3

- Learn SQL basics: SELECT, JOINS, Aggregations
- Create databases, tables & E-R diagrams
- Optimise queries with AI tools like EverSQL
- Use GenAI for query generation & debugging
- Mini Project: Social Media Engagement Analysis

# Program Curriculum

## Python for Data Science

4

- Python essentials: data types, functions, lists
- Manipulate data with NumPy & Pandas
- Visualise insights using Matplotlib, Seaborn
- Use Copilot to debug, refactor & generate code
- Mini Project: Accident Analysis Dashboard

## Statistics & Probability

5

- Explore mean, median, and standard deviation
- Understand distributions: normal, binomial
- Conduct tests: Hypothesis, ANOVA, Chi-Square
- Use AI tools for automating analysis & reporting
- Explain stats insights using GenAI

## Machine Learning

6

- Supervised Learning: Linear & Logistic Regression, Classification
- ML Algorithms: Decision Trees, Random Forests, KNN, SVM, Time Series
- Unsupervised Learning: K-Means, Hierarchical Clustering, PCA, MBA, RFM
- Evaluate Models: Confusion Matrix, ROC-AUC, MAE, RMSE
- Model Tuning: Cross-Validation & Hyperparameter Optimization
- Build end-to-end ML pipelines with scikit-learn
- Explain model behavior using SHAP & LIME
- Auto-generate ML Code & pipelines using GenAI (ChatGPT, Gemini)
- Prompt-driven model suggestions with Jupyter AI

## Power BI & Tableau

7

- Import & transform data using Power Query & Joins
- Build data models & define relationships
- Create Visuals: Bar, Line, Maps, KPI Cards
- Write formulas using DAX & Tableau Calculations
- Design interactive dashboards with Filters & Drilldowns
- Publish & share reports across teams
- Generate Insight Narratives using GenAI using Copilot
- Natural Language Queries (Q&A) & AI Chart suggestions

# Program Curriculum

## Model Deployment

8

- Deploy models using Flask & Gradio
- Build ML apps with Streamlit
- Launch models on AWS (EC2, SageMaker)
- Integrate HuggingFace & deploy DL solutions

## Deep Learning & AI

9

- Learn neural nets, activation functions, optimisers
- Build CNNs for image classification (Keras, TensorFlow)
- Apply RNNs & LSTMs for sequence data
- Use BERT, GPT, YOLO for NLP & Vision tasks
- Design DL models with GenAI & prompt engineering

## Generative AI for Data Professionals

10

- Learn about LLMs & their applications
- Use tools like ChatGPT, Bard, Claude, and Copilot
- Automate summaries, reports & translations
- Build AI chatbots using RAG & storytelling bots
- Create auto-insight generators

## Project Bootcamp

- Collaborate on real-world projects in a group setting
- Present your solutions and receive real-time feedback from industry experts
- Engage with real-world case studies and group discussions
- Get industry-ready through mock interviews and practical exposure

# Tools and technologies covered

## Programming Languages

## Data Handling & Processing

## Data Visualisation

## Cloud & Deployment

## Generative AI & LLMs

## AI Development Tools

# Industry Projects

Apply your skills to real-world challenges through industry-aligned projects.

## Credit Card Approval Prediction

- Build a predictive model to analyse if the credit card will be approved for a customer.
- Understand how the banking industry uses ML for Risk Analysis.

## E-commerce Customer Segmentation

- Build a predictive model to group customers with similar interests.
- Learn how the e-commerce industry uses machine learning to analyse customers to serve them better.

## Customer Lifetime Value Prediction

- Build a model to analyse customer transaction data to understand the Customer Lifetime Value.
- Learn how the retail industry uses the RFM model to ensure customer satisfaction.

# Industry Projects

Apply your skills to real-world challenges through industry-aligned capstone projects.

## Human Emotion Recognition

- Use Computer Vision techniques to build models to analyse images and predict emotions on human faces.
- Understand how to work on image data processing and how the ComputerVision field works.

## Fake News Prediction

- Use NLP techniques to analyse the textual data and classify whether a news article is real or fake.
- Understand how the NLP field works and learn how to work with unstructured textual data.

## Stock Market Analysis

- Implement different Power BI features to create a visual dashboard that analyses stock price data for Amazon, Google, Apple and IBM.
- Understand how market research teams use BI tools to analyse and interpret market trends.

# Learn under expert guidance

Learn from industry leaders shaping Data and GenAI, and master skills through practical, real-world guidance.

## Karthik C

**VP - Data science Training | Ex-Amazon**

Karthik is a GenAI and NLP expert with 12+ years of experience at Mu Sigma and Amazon. A former Head of Alexa AI Knowledge (ANZ), he has trained 7K+ learners and spoken at TEDx and global AI summits. His approach blends technical rigour with business relevance.

## Nikita Tandel

**AVP – Analytics Faculty Head, Imarticus Learning Pvt. Ltd**

With over 7.5 years of experience and a Master's in IT, Nikita leads the data science faculty at Imarticus. She has trained 10,000+ professionals in Python, ML, and deep learning. A certified SAS Developer, she bridges classroom learning with industry execution.

## Madhu Kiran S

**Consultant/Trainer – Data Science, Business Analytics & Marketing Research**

With 15+ years in analytics at firms like AOL and Oracle, Madhu brings a blend of industry depth and academic excellence. He has trained over 1,000 learners, focusing on real-world application and critical thinking. He holds a Master's in Data Science from the University of Texas.

# Advanced Data Science Projects by our Learners

## Conversational AI Chatbot

Deployed a real-time, document-aware chatbot using LLMs with scalable backend and robust response handling.

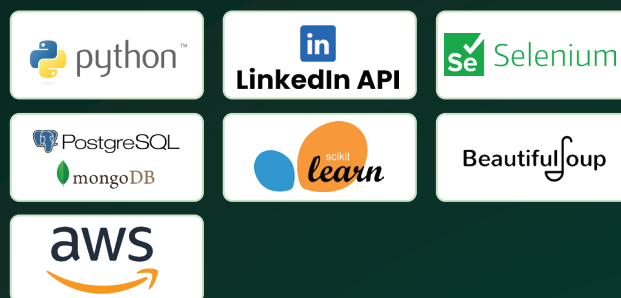

Tools/Frameworks Used

## Placement Tracking & Insights System

Built a platform to track student placement outcomes and job trends using scraping and predictive analytics.

Tools/Frameworks Used

## AI-Powered Resume Reviewer

Created a 24/7 accessible resume feedback engine with ATS-focused, role-specific, and grammar-enhancing suggestions.

Tools/Frameworks Used

# Advanced Data Science Projects by our Learners

## Retail Query Assistant

Engineered a tool to extract structured insights from diverse file formats using vision-based and text-based AI.

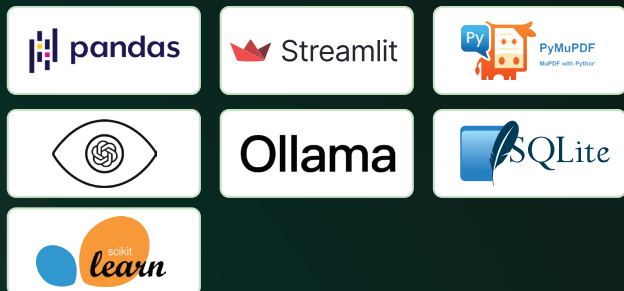

Tools/Frameworks Used

## Sales Enablement Assistant

Enabled data-driven pitch support with region-wise insights, FAQs, and document-based real-time responses.

Tools/Frameworks Used

## AI Interview Simulation Platform

Created a 24/7 accessible resume feedback engine with ATS-focused, role-specific, and grammar-enhancing suggestions.

Tools/Frameworks Used

Note: These are Projects completed by our learners as part of the data science consulting club.

# Industry-ready skills for your career growth

Gain practical expertise through focused training and personalised preparation.

## Career Counselling

Get personalised guidance and actionable plans designed to help you move your career forward with clarity and confidence.

## Aptitude Training

Excel in employer aptitude tests with our targeted problem-solving training.

## Build your proof of Work

Build a standout portfolio to differentiate yourself from prospective employers.

## Interview Preparation

Learn to crack interviews with mock sessions and expert feedback.

## Job Placement

Get a minimum of 10 interview opportunities to kickstart your career.

# Roles you can step into

**17k+**  
Job Openings

## **Analytics Manager**

Designs and oversees efficient strategies for data collection, research, and analysis, and implements analytics solutions to improve a company's products or services.

**15k+**  
Job Openings

## **Research Analyst**

Analyses market and financial data, employing quantitative skills to summarise findings for project alignment.

**12k+**  
Job Openings

## **Data Analyst**

Translates complex data into strategic insights, using BI tools to support decision-making and streamline business operations.

**10k+**  
Job Openings

## **AI/ML Researcher**

Innovates in AI/ML algorithm development for speech and recommendation systems, prototyping and collaborating globally.

**7.2k+**  
Job Openings

## **Machine Learning Engineer**

Develops, designs, and optimises models with data engineers, applying techniques for high-performance systems.

**5k+**  
Job Openings

## **Data Scientist**

Focuses on feature selection, classifier optimisation, data mining, and presenting clear analytical results.

# What our learners have to say

Know how our industry connections and career support helped them land roles in top firms.

**Shubham K. Sahu**  
Associate Consultant

Capgemini 

Imarticus Learning was crucial in my transition from an electronic development engineer to the data science domain with its well-structured training curriculum. The faculty, especially Utkarsh Sir, explained complex algorithms most simply, making them easy to grasp. The mock interviews were invaluable, helping me identify areas for improvement and boosting my confidence for actual interviews. I am truly overwhelmed by their continuous placement support, including resume assistance, soft skills sessions, and interview scheduling. I am grateful for their unwavering guidance throughout my journey.

**Deeksha Sharma**  
Data Scientist

Capgemini 

I am so thankful to Imarticus Learning for helping me secure a position at Capgemini. The training was thorough, current, and designed to address industry challenges. The faculty was knowledgeable and supportive, making complex concepts easily grasped through interactive teaching methods. Furthermore, the exceptional placement support guided me through every step of the job search process, including resume building and interview preparation. Their dedication gave me the confidence to succeed. I highly recommend Imarticus Learning to anyone looking to advance their career prospects.

**Akshat Sharma**  
Data Analyst

Flipkart 

I had an exceptional learning experience at Imarticus Learning. The training was comprehensive and well-structured, and Gaurav Sir's teaching style was outstanding, making complex topics easy to understand. The placement support was equally impressive. Divyansh Sir provided invaluable guidance throughout the placement process, which ultimately helped me secure a top placement. Imarticus Learning gave me the skills and confidence needed to advance my career. The overall experience was enriching, and I am genuinely grateful for the support and knowledge I received.

**Sushmitha Amirishetty**  
Analyst

The Data Science and Analytics with GenAI program at Imarticus Learning provided me with a perfect blend of theoretical knowledge and practical experience, helping me enhance my skills. Dhananjay Sir's expert guidance and valuable insights made the learning process smooth and engaging. His ability to simplify complex concepts was invaluable. Imarticus Learning's excellent placement assistance also ensured that I secured a job with a reputable company in no time. I am grateful for the mentorship and support throughout the journey and highly recommend the program to anyone looking to build a successful career in Data Science.

**Honey Punamiya**  
PowerBI Developer

I am so happy that I enrolled and completed the Data Science and Analytics with GenAI postgraduate program from Imarticus Learning; the program exceeded my expectations. Irfan Sir's exceptional training simplified complex concepts, making the learning process engaging and practical. Sameer's seamless coordination of placement activities ensured that I felt fully supported throughout the program. It provided an ideal balance of technical knowledge and real-world applications, giving me the confidence to succeed in the industry. Completing this program has been a transformative experience, and I highly recommend Imarticus Learning to anyone looking to build a career in data science and analytics.

**Piyush More**  
Python Data Analyst

My experience with Imarticus Learning was incredibly positive. The training provided a solid foundation in the subject matter, with a curriculum designed to meet industry standards. The faculty was highly knowledgeable and supportive, always available to clarify doubts and guide us through challenges. The placement support was outstanding, offering personalised guidance, resume building and interview preparation, which gave me the confidence to explore job opportunities effectively. Imarticus Learning equips its learners with the skills and resources needed to succeed, making it a fantastic choice for career growth.

# What sets this program apart

## Learning Experience

Industry Readiness

Placement Support

Classroom Learning

Data Science and AI Studio

Project Bootcamp

Advanced Data Science & AI Consulting Club Internships

Data Science Competition

Hackathons and Blogathons

Dedicated Program Manager

Personalised Mentorship

Assessments & Grading

360° Learning Experience

## With Imarticus

**6–10 month, hands-on, job-focused curriculum**

**500+ hiring partners, dedicated team**

**300+ hours live + offline, doubt-clearing**

**Exclusive hands-on ecosystem with real projects & challenges, internships, and masterclasses**

**Real-world projects with expert mentors**

**Advanced consulting club + internships**

**National level competitions to build credibility**

**National level Hackathons & Blogathons with real challenges to showcase skills**

**Personal manager for progress & issue resolution**

**1:1 mentorship with industry experts**

**40+ hours of resume, interview, and job prep**

**Expert-led live GenAI sessions**

**Industry-level assessments to validate skills**

**Holistic growth via live classes, projects & career support**

## Others

Longer, theory-heavy, fewer job outcomes

Limited help, mostly generic job portals

<200 hours, self-paced, minimal support

limited exposure to live industry challenges or experiential learning

Generic projects, no expert guidance

Basic projects, little or no internship

Rarely any industry-recognized contests

Limited or no access to hackathons or blogathons

Limited, inconsistent, often automated

Generic, little or no personal support

<10 hours, generic or self-paced

Self-paced videos, minimal interaction

basic, lacks real-world rigor

Fragmented learning with major gaps

# Who Should Enrol for this Program?

## Freshers and Early-Career Professionals (0–3 yrs)

Whether you're a fresher or an early-career professional, this program helps you build strong foundations, get hands-on with tools, and become truly placement-ready.

### Ideal for students and professionals from:

- UG/PG students from STEM (Science, Technology, Engineering, Maths) or Economics backgrounds
- Candidates with >50% marks in UG/PG
- No education gap over 2 years
- Working professionals with ≤3 years of experience

## Eligibility criteria for Job Assurance

- Final grades should be at least 60%
- Pass all Imarticus mock interviews and project evaluation
- Have an average attendance of at least 80% for each module
- Your present CTC must be below 4 LPA to be eligible for placement assurance.
- Demonstrate professional conduct throughout the course, meeting the standards set by Imarticus.

# Program Certification

## Certificate of Completion

Awarded to

**Yasin Khatri**

upon successful completion of the curriculum as prescribed by the Institute for

**Postgraduate Program in  
Data Science and Analytics with GenAI**

  
Nikhil Barshikar  
Director

Imarticus Learning Private Limited

September, 2020

[www.imarticus.org](http://www.imarticus.org)

- ◆ Your certificate will feature an Exclusive QR code, offering instant access to detailed verification and authentication.
- ◆ Earn an in-demand Post Graduate Program in Data Science and Analytics with GenAI certificate upon completing this course, fortifying your professional profile.

# Moments of Honour

A legacy of recognition and excellence.

'Best E-Learning  
Company Of The Year'
